FUND INFORMATION

Perkins Discovery Fund

Total Net Assets	\$30.7 million
NAV	\$57.17
Min. Initial Investment	\$2,500
Min. Subsequent Investment	\$100
NASDAQ Symbol	PDFDX
Load	None
Inception Date	4/9/1998
Gross Prospectus Expense Ratio*	3.38%
Net Expense Ratio*	2.50%
Redemption Fee	1% within 45 days of purchase

*The Advisor has contractually agreed to reduce its fees and/or pay Fund expenses (excluding Acquired Fund Fees and Expenses, interest expense in connection with investment activities, taxes and extraordinary expenses) in order to limit Total Annual Fund Operating Expenses After Fee Waiver and/or Expense Reimbursement for shares of the Fund to 2.25% of the Fund's average net asset (the "Expense Cap"). The Expense Cap will remain in effect until at least July 31, 2019. Investment performance reflects fee waivers, in the absence of such waivers, total return would be reduced.

INVESTMENT PHILOSOPHY

The primary emphasis of the Perkins Discovery Fund is investing in micro-cap companies. Over the long term, emerging micro-cap companies have the greatest growth potential but also have the most risk. The fund will close to new investors at \$100 million in net assets.

INVESTMENT STRATEGY

The primary emphasis of this Fund is investing in common stocks of domestic companies with a market capitalization at the time of purchase of under \$1 billion. The Fund is an aggressive growth fund. In selecting investments, the Advisor seeks opportunities for growth by investing in companies that it believes will appreciate in value. In its selection process, the Advisor visits companies, reads a variety of reports and publications and utilizes computer programs to assess the attractiveness of an individual security.

GROWTH OF \$10,000

Perkins Discovery Fund

The chart illustrates the performance of a hypothetical \$10,000 investment made in the Perkins Discovery Fund since the fund's inception through March 31, 2019. Assumes reinvestment of dividends and capital gains, but does not reflect the effect of any applicable sales charge or redemption fees. This chart does not imply any future performance.

PERFORMANCE

Fund's Average Annualized Returns as of March 31, 2019

	Inception Date	Since Inception	15 Year	10 Year	5 Year	3 Year	1 year	YTD
Perkins Discovery Fund	04/09/98	11.20%	8.16%	16.05%	8.09%	27.83%	41.16%	22.11%
Wilshire U.S. Micro-Cap Index		7.22%	5.12%	14.49%	2.98%	10.13%	-4.82%	12.34%
NASDAQ Composite Index		7.14%	9.45%	17.59%	12.98%	16.65%	9.43%	16.49%

Performance data quoted represents past performance; past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. Current performance of the fund may be lower or higher than the performance quoted. Performance data current to the most recent month end may be obtained by calling 1-800-998-3190.

While the fund is no-load, management and distribution fees and other expenses still apply. Please refer to the prospectus for details.

Important Risk Disclosure - The following principal risks associated with the fund can affect the value of your investment:
General Market Risk: The market price of a security may fluctuate, sometimes rapidly and unpredictably. These fluctuations may cause a security to be worth less than its cost when originally purchased or less than it was worth at an earlier time.
Equity Risk: Since the Fund purchases equity securities, it is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund's equity securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. These factors contribute to price volatility.
Management Risk: The Adviser may fail to implement the Fund's investment strategies and meet its investment objective.
Smaller Companies Risk: Investing in securities of smaller companies including micro-cap, smallcap, medium-cap and less seasoned companies often involve greater volatility than investing in larger, more established companies and these securities may be less liquid than other securities.
Small Portfolio Risk: Although the Fund is diversified, from time to time, it holds a relatively small number of securities (i.e., under 40). As a result, an increase or decrease in the value of a single security held by the Fund may have a greater impact on the Fund's net asset value and total return. Read the prospectus for more information about these and other risks associated with the fund.

Wilshire U.S. Micro-Cap Index: represents a float adjusted, market capitalization-weighted portfolio of all stocks below the 2,500th rank by market capitalization in the Wilshire 5000 at March 31 and September 30 of each year. Russell 2000 Index: composed of the 2,000 smallest companies in the Russell 3000 Index, and is widely regarded in the industry as the premier measure of small-cap stocks. NASDAQ Composite Index: a broad-based capitalization-weighted index of all NASDAQ national market and small-cap stocks. S&P 500 Index: a market-value weighted index consisting of 500 stocks chosen for market size, liquidity, and industry group representation. One cannot invest directly in an index.

INVESTMENT PROCESS

Stocks are purchased when it is believed that change will result in higher earnings and/or a higher price/earnings ratio, and thus a higher share price when the change is recognized by others. Companies undergoing change may have new products, processes, strategies, management, or may be subjected to change by external forces. Perkins Capital Management uses a combination of both fundamental and technical analysis in its quest to uncover investment opportunities. We want to have a good understanding of what companies do and to know who is running them. This investment style can best be described as "bottom-up" investing, as opposed to the "top-down" style of following general market trends.

The Perkins Discovery Fund uses this approach to focus on micro-cap companies. While investing in smaller companies may involve greater risks, companies fitting this criteria present an opportunity to achieve superior returns because they are not well known to the investing public and have less investor following.

TOP TEN HOLDINGS

Security	(% of portfolio)
Veracyte, Inc.	4.5%
Fluidigm Corp.	3.9%
